Dog report-filed

Jeff Babcock, IT Administrator

The IT Director talked with several officers within the County about the phone switch replacement project. Newer and better technologies have become available for on-premise phone systems since the existing system was installed. Many of these technologies will be of great benefit to County officers and it is crucial that they be implemented at the start of the project. During the discussions about the phone system, the subject of reforming the 911 Committee was raised again.

There was a power outage on Thursday, 4 April 2019, at close of business. The following day, the phone system had to be restored to operation. Also, there is currently a problem with the Riecker Building's HVAC building control unit (BCU). Changes that were made previously to the BCU's configuration have been erased and the BCU appears to have been reset to a default state. Troubleshooting is ongoing.

State takes steps to address potential information disclosure involving Ohio Benefits

COLUMBUS — The Ohio Departments of Administrative Services (DAS), Medicaid, and Job and Family Services (ODJFS) are taking steps to address the potential disclosure of personal information in the Ohio Benefits System.

Ohio Benefits supports certain ODJFS and Medicaid programs and is administered through a contract with Accenture under the purview of DAS. The issues did not impact any benefits.

The issue involves three recent incidents:

- February 16, 2019: Approximately 250 users of the Ohio Benefits Self-Service Portal were impacted by a computer error. That error resulted in some of their personal information appearing in another user's account. The error was fixed the same day it was discovered.
- March 20, 2019: A computer error resulted in information for 643 individuals (608 individuals receiving JFS benefits and 34 individuals receiving Medicaid benefits, and 1 individual receiving benefits from both agencies) within the Ohio Benefits system being erroneously mailed to five unrelated people. The issue was addressed on March 22, 2019.
- March 20, 2019: Up to 100 clients were impacted when data entered into the Ohio Benefits Portal was incorrectly saved to the wrong account due to a computer error. A temporary solution has been put in place and a permanent solution is underway.

The data potentially viewed in these incidents involved case and claim numbers, names and addresses, and may include contact information and dates of birth. In no instances were health or medical records viewed. Out of an abundance of caution and transparency, the State is providing notification to the public and those impacted.

Those potentially impacted by the issue are being notified and will be offered one year of identity theft protection at no cost. Details on that coverage will be included in the notifications to impacted individuals.
